The U.S. forklift division stationed in Cleveland has a expert team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

In the beginning the domestic forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a home-based machinery expansion venture. Sales of these products were originally targeted to state-run corporations, large scale businesses, and the military. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Daewoo started the first domestic forklift business in 1967, and rapidly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological enhancements combined with sales success placed them in a position of significant growth of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to counter act competitive pressures in the US materials handling market. This endeavor greatly expanded Daewoo's forklift sales. Construction was finished in 1984 to facilitate a new plant which helped launch the company for the fabrication of high added-value products suited for export. In 1993, the corporation had a global sales network and started exporting designs they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international marketplaces.
